

SUPERfeet®

THE PREMIUM INSOLE

Classic fit, comfort and performance.

GREEN

BLUE

Superfeet's original GREEN and BLUE Premium Insoles are the foundation on which our company was built. Over thirty years ago, Superfeet's founders at Northwest Podiatric Laboratory employed the proven biomechanical principles of podiatric medicine to develop and dispense an over-the-counter insole. Their goal of providing more affordable orthotics to the general public resulted in the successful creation of our now-classic GREEN insole. BLUE was patented a few years later as a solution to fit even more foot types and add support in lower volume footwear. Since then, the GREEN and BLUE have become our two most popular and versatile insoles.

Every Superfeet Premium Insole features a patented stabilizer cap for optimal under-foot support. When integrated with the shape and design of the foam full length, this unique combination creates a deep heel cup to cradle the heel's fat pad for improved natural shock absorption. This system provides comfort and necessary stability for different activities, footwear and foot types.

Patented heel cup cradles and centers the fat pad under the heel to absorb shock.

High-density foam ensures contoured comfort and long-lasting support.

Patented contour shape properly adapts 2-dimensional footwear to the 3-dimensional foot.

Patented stabilizer cap firmly supports and aligns the rearfoot.

GREEN vs. BLUE

HEEL CUP

Deeper heel cup offers the most natural support and maximum shock absorption of all our models.

VOLUME

Higher volume fills footwear with removable insoles.

FOUNDATION FOAM

Thicker 1/8" high-impact closed-cell foam will not absorb moisture. Thickness takes up more volume in the shoe.

RECOMMENDED FOOTWEAR

Higher volume footwear with a wider heel counter and a removable insole. Ideal for running, hiking, alpine and industrial footwear.

HEEL CUP

Shallower heel cup adds versatility in protecting and supporting the rearfoot for the majority of foot types.

VOLUME

Lower volume accommodates tighter-fitting footwear.

FOUNDATION FOAM

1/16" high-impact closed-cell foam will not absorb moisture. Thinner foam takes up less volume in the shoe.

RECOMMENDED FOOTWEAR

Lower volume footwear with a narrower heel counter and insoles that are either removable or glued in place. Ideal for running, hiking, casual and cleated footwear.

Our XLPE (cross-linked polyethylene) foam, FOUNDATION™, provides durable biomechanical support. This ultra-light, closed-cell foam resists moisture and helps reduce shock while offering advanced comfort. FOUNDATION's resilience and strength optimizes the performance of all our Trim-to-Fit Premium Insoles.

Our XLPE (cross-linked polyethylene) foam, FOUNDATION™, provides durable biomechanical support. This ultra-light, closed-cell foam resists moisture and helps reduce shock while offering advanced comfort. FOUNDATION's resilience and strength optimizes the performance of all our Trim-to-Fit Premium Insoles.

Nature's antimicrobial

We treat the top covers of all our Trim-to-Fit Premium Insoles with Agion® antimicrobial technology. Agion's natural, silver-based antimicrobial is built right into our products to provide long-lasting protection against bacteria. Agion adds continuous cleanliness to our Premium Insoles - creating a clean, comfortable combination.

Green is available in sizes A-H | Blue is available in sizes J-G

SUPERFEET SIZING CHART

	J	A	B	C	D	E	F	G	H
