# SUPERfeet®

The Superfeet GREY Premium Insole is now YELLOW... but the changes aren't just cosmetic. Aside from the new visual appeal, we've improved the design of the first insole in the skate industry created to fit the exact heel-to-toe profile of hockey skates. The YELLOW features a wider forefoot to accommodate newer skate designs, offering better underfoot coverage. Our new Diamond Venting system is designed to align with the perforated outsoles of hockey skates and road cycling shoes for improved air circulation around the foot. The biomechanical shape and integrated ramp angle of the YELLOW still provide the same firm underfoot support and excellent fit as the GREY in hockey skates, figure skates and road cycling shoes. The YELLOW is also available in two new sizes to fit the smallest and largest feet and footwear: A and G.

## ENCAPSULATING STABILIZER SYSTEM

- 1 Our patented heel cup design cradles the heel's fat pad for improved natural shock absorption.
- 2 Patented contour shape properly adapts 2-dimensional footwear to the 3-dimensional foot.
- 3 Encapsulating Stabilizer System™ [ESS]™ provides firm underfoot support.
- 4 High density foam ensures long-lasting comfort and support.

### Diamond Venting System

Venting holes through the foam full length line up with perforated outsoles to stimulate air circulation and control moisture. A strategically centered design ensures that the foam retains its integrity in the forefoot, preserving the overall full length structure.

### H2T: Heel-to-Toe Profile

Angled stabilizer cap provides constant contact with the outsole for ultimate control and energy transfer. The heel-to-toe profile contours the foot and improves the fit, comfort and performance of any skate or footwear with a raised heel.

## SUPERFEET YELLOW IS AVAILABLE IN SIZES A-G

SUPERFEET SIZING CHART									
	J	A	B	C	D	E	F	G	H
