TUBBS[®]
SNOWSHOES

2017-2018
LOOKBOOK

“I like that Tubbs is a brand that’s been around for over 100 years and a brand that’s been able to adapt and change with new technology. The history is cool, brand longevity is important to me.”

For over 110 years we have had the honor to help get more people outside during the winter; from mellow meadow trails, to steep mountainous ascents. We look forward to continuing our dedication to creating the best products possible, to help deliver the best snowshoe experience for every adventure.

GET TO KNOW THE PEOPLE who help lead the grassroots effort of growing the snowshoeing community. Explore stories of family adventures full of trail snacks and animal tracks, or read tips from peak-seeking hikers in the backcountry. From beginners to mountaineers, Tubbs Ambassadors represent the wide range of fun and active snowshoers throughout the world.

Meet the Tubbs Ambassador Team at tubbssnowshoes.com

TECHNOLOGY

Boa® FAMILY

Creating a better snowshoe experience through the best product possible is our ultimate goal at Tubbs. Which is why we chose to add the benefits of the Boa® Closure System.

Closure system to our Panoramic, Flex VRT, Wayfinder and Flex RDG snowshoes.

- Perfect binding fit with the simple twist of a dial
- On the fly adjustability without having to remove your gloves
- Once locked into place, the Boa® reels stay that way.
- When your adventure is over, simply pull up the dial to loosen your bindings.

TUBBS Boa® DYNAMIC FIT™

TUBBS Boa® CUSTOM WRAP™

CUSTOMWRAP™

- A few twists of the Boa® dial takes care of all binding adjustments, including the heel strap.
- Easily adjustable
- Includes EVA foam for extra warmth and comfort.

DYNAMICFIT™

- Added EVA foam for extra warmth and comfort
- Roller buckle heel strap for quick adjustability
- Evenly distributed tension around your boot with the Boa® closure configuration.

TECHNOLOGY

FLEX FAMILY

Designed to optimize traction, biomechanics, and comfort the FLEX Series snowshoes are a great lightweight alternative to more traditional snowshoes, especially for compact snow conditions.

FLEX TAIL™

FLEX Tail technology allows the snowshoe to roll more naturally underfoot from heel strike, to toe off. It also absorbs shock from initial heel strike, reducing the amount of stress on ankles, knees, and hips.

TORSION DECK™

Our Torsion Deck allows for better torsional articulation throughout the whole snowshoe, maximizing comfort and traction on uneven terrain.

TRACTION RAILS™

3D curved Traction Rails on all FLEX series snowshoes ensure superior side-hill grip in hard-packed and icy conditions. The curved shape helps prevent fore-aft slippage on steeper terrain, and the rails are curved at the tip to provide traction during toe off.

Backcountry snowshoeing means breaking trail to a destination of your choosing. You're not following tracks and you're relying on your ability to route plan and navigate. This can be a single day or multi-day trip." - Ambassador John Soltys

MOUNTAINEER

The ultra-precise ActiveFit™ binding and snow-shredding Anaconda™ crampon gives the Mountaineer the go-anywhere, do-anything versatility you need to reach for the peaks or explore uncharted terrain.

Men's available sizes: 25, 30, 36"	Weight/Pair: 4.9 lbs / 2.2 kg (25")
Women's available sizes: 21, 25, 30"	Weight/Pair: 4.8 lbs / 2.2 kg (25")
Frame and Decking:	Pro-Step™ Frame, Soft-Tec™ Decking
Articulation:	R2™ Revolution Response
Control:	ActiveFit™ Binding
Traction:	Anaconda™ Toe Crampon, Python™ Heel Crampon
Other:	ActiveLift™ 19° Heel Lift

FLEX VRT

The DynamicFit™ binding with the Boa® Closure System produces evenly distributed tension around your boot for ultimate precision. The FLEX Tail™ design eases stress on your joints, allowing you to summit even the most intense peaks.

Men's available sizes: 24, 28" (XL)	Weight/Pair: 4.5 lbs / 2.04 kg (24")
Women's available sizes: 22"	Weight/Pair: 4.0 lbs / 1.81 kg
Frame and Decking:	Torsion Deck™, FLEX Tail™
Articulation:	Rotation Limiter
Control:	DynamicFit™ Binding
Traction:	Viper 2.0™ Toe Crampon, Traction Rails
Other:	ActiveLift™ 19° Heel Lift

FLEX ALP

A brand staple, the FLEX ALP continues to attract backcountry enthusiasts all over the world. Featuring micro-serrated 3D-Curved Traction Rails and the Viper 2.0™ toe crampon, the FLEX ALP devours steep, icy terrain, while the shoe's Torsion Deck design reduces stress on your joints, creating a natural stride.

Men's available sizes: 24, 28" (XL)	Weight/Pair: 4.5 lbs / 2.04 kg (24")
Women's available sizes: 22"	Weight/Pair: 4.0 lbs / 1.81 kg
Frame and Decking:	Torsion Deck™, FLEX Tail™
Articulation:	Rotation Limiter
Control:	ActiveFlex™ Binding
Traction:	Viper 2.0™ Toe Crampon, Traction Rails
Other:	ActiveLift™ 19° Heel Lift

“ I think of day hiking as involving a light pack with food, water, first aid and emergency overnight gear. Still hills, ridges and lake crossings. It may also involve more established trails. “
 – Ambassador Tim Taylor

PANORAMIC

Introduced last season to the Day Hiking line, the Panoramic delivers optimal flotation in fresh snow, while the snowshoe's DynamicFit™ binding with Boa® Closure System, provides an uncompromised precision fit. The Panoramic's Cobra™ traction grips icy, variable terrain with ease, so you can always reach the best view on the trail.

Men's available sizes: 25, 30, 36"	Weight/Pair: 4.5 lbs / 2.04 kg (25")
Women's available sizes: 21, 25, 30"	Weight/Pair: 4.5 lbs / 2.04 kg (25")
Frame and Decking:	Fit-Step™ Frame, Soft-Tec™ Decking
Articulation:	R2™ Revolution Response
Control:	DynamicFit™ Binding
Traction:	Cobra™ Toe Crampon, Tubbs Heel Crampon
Other:	ActiveLift™ 16° Heel Lift

WILDERNESS

Packed full of great features like the 180 Pro™ binding and the Fit-Step™ frame, the Wilderness is the perfect blend of technology, comfort, and convenience. There's no adventure this snowshoe can't tackle!

Men's available sizes: 25, 30, 36"	Weight/Pair: 4.5 lbs / 2.04 kg (25")
Women's available sizes: 21, 25, 30"	Weight/Pair: 4.5 lbs / 2.04 kg (25")
Frame and Decking:	Fit-Step™ Frame, Soft-Tec™ Decking
Articulation:	Rotation Toe Cord
Control:	180° Pro Binding
Traction:	Cobra™ Toe Crampon, Tubbs Heel Crampon
Other:	ActiveLift™ 16° Heel Lift

FLEX RDG

Designed to handle a wide variety of all-mountain terrain, the FLEX RDG features our easiest-to-use CustomWrap™ binding with Boa® Closure System. It's our only binding that incorporates the heel-strap into the binding's construction, creating exceptional full-foot precision with the simple twist of a dial.

Men's available size: 24"	Weight/Pair: 3.9 lbs / 1.75 kg
Women's available size: 22"	Weight/Pair: 3.5 lbs / 1.57 kg
Frame and Decking:	Torsion Deck™, FLEX Tail™
Articulation:	Rotation Limiter
Control:	CustomWrap™ Binding
Traction:	Traction Rails, Tubbs Toe Crampon
Other:	ActiveLift™ 16° Heel Lift

FLEX TRK

Created for snowshoers that enjoy varied terrain, the FLEX TRK offers superior maneuverability thanks to its smooth style and ergonomic stride. The QuickPull™ binding slides easily to cinch and unlocks with one push of a buckle.

Men's available size: 24"	Weight/Pair: 3.8 lbs / 1.75 kg
Women's available size: 22"	Weight/Pair: 3.4 lbs / 1.54 kg
Frame and Decking:	Torsion Deck™, FLEX Tail™
Articulation:	Rotation Limiter
Control:	QuickPull™ Binding
Traction:	Traction Rails, Tubbs Toe Crampon
Other:	ActiveLift™ 16° Heel Lift

I think of trail walking as more level terrain, for example a rail trail. I think it's a good way for beginners or less confident winter folks to get comfortable on their snowshoes. — Ambassador Sheila Goss

WAYFINDER

Perfect for snow-covered meadows or city parks, the Wayfinder's easy-to-use CustomWrap™ binding with Boa® Closure System will get you on the trail in no time. With the heel-strap incorporated into the binding's construction, the CustomWrap™ delivers a full-coverage fit with a simple click and twist.

Men's available sizes: 25, 30, 36"	Weight/Pair: 3.9 lbs / 1.76 kg (25")
Women's available sizes: 21, 25"	Weight/Pair: 3.8 lbs / 1.72 kg (25")
Frame and Decking:	Fit-Step™ Frame, Soft-Tec™ Decking
Articulation:	Rotating Toe Cord
Control:	CustomWrap™ Binding
Traction:	Recreational Toe and Heel Crampons

FRONTIER

The Frontier features the 180™EZ binding for superior ease-of-use and comfort. The Frontier's lightweight and gender-specific designs deliver the most efficient performance for packed trails.

Men's available sizes: 25, 30, 36"	Weight/Pair: 3.9 lbs / 1.76 kg (25")
Women's available sizes: 21, 25, 30"	Weight/Pair: 3.8 lbs / 1.72 kg (25")
Frame and Decking:	Fit-Step™ Frame, Soft-Tec™ Decking
Articulation:	Rotating Toe Cord
Control:	180° EZ Binding
Traction:	Recreational Toe and Heel Crampons

XPLORE

The best way to start snowshoeing! The Xplore snowshoe is the lightweight, easy-to-use answer for the value conscious customer experiencing snowshoeing for the first time. The intuitive QuickPull™ binding slides plus tightens easily and unlocks with one push of a buckle.

Also available in men's and women's kit versions. See page 23

Men's available size: 25, 30"	Weight/Pair: 3.6 lbs / 1.6 kg (25")
Women's available size: 21, 25"	Weight/Pair: 3.5 lbs / 1.55 kg (25")
Frame and Decking:	Fit-Step™ Frame, Soft-Tec™ Decking
Articulation:	Rotating Toe Cord
Control:	QuickPull™ Binding
Traction:	Recreational Toe and Heel Crampons

FLEX ESC

We've revamped the FLEX ESC which already utilized the FLEX™ Series frames and added the added benefit of a heel lift bar. This provides a great balance of affordability and useful features, for those getting out on snowshoes for the first time.

* Unisex available size: 24"	Weight/Pair: 3.9 lbs / 1.75 kg
* Recommended shoe size	(Women- 8-13 and Men 7-13)
* Unisex available size: 22"	Weight/Pair: 3.6 lbs / 1.63 kg
* Recommended shoe size	(Women- 6-11 and Men 5-10)
Frame and Decking:	Torsion Deck™, FLEX Tail™
Articulation:	Rotating Limiter
Control:	QuickPull™ Binding
Traction:	Traction Rails, ActiveLeft™ Tubbs Toe Crampon

FLEX STP

For new snowshoers and those looking for added comfort on their excursions, the FLEX STP offers the perfect opportunity for value-conscious buyers searching for the technical advancements of the FLEX™ Series frames at an affordable price.

Also available in men's and women's kit versions. See page 23

Men's available size: 24"	Weight/Pair: 3.6 lbs / 1.63 kg
Women's available size: 22"	Weight/Pair: 3.3 lbs / 1.50 kg
Frame and Decking:	Torsion Deck™, FLEX Tail™
Articulation:	Rotating Limiter
Control:	QuickPull™ Binding
Traction:	Traction Rails, Tubbs Toe Crampon

KITS

A perfect gift for the holidays, our snowshoe kits are an excellent starter package for someone new to the sport looking to take advantage of winter!

XPLORE KIT

Available in men's and women's kits, kit contents include the following:

- One pair men's or women's Xplore snowshoes
- One pair 2-part adjustable snowshoe poles
- One pair men's or women's gaiters

FLEX STP KIT

Available in men's and women's kits, kit contents include the following:

- One pair men's or women's FLEX STP snowshoes
- One pair 2-part adjustable snowshoe poles
- One FLEX Series snowshoe tote bag

“Winter is for snowball fights, hot chocolate, and a fun day exploring outside”

FLEX HKE

Designed exclusively for those who have outgrown smaller kids' snowshoes but aren't yet ready to step into a full-size adult model, the all-new FLEX HKE features Traction Rails that keep the snowshoes steady on icy slopes and variable terrain, with our Torsion Deck™ design for optimal flotation. Equipped with the simple QuickLock2™ binding – with its easy-stretch heel strap – the HKE is ready for anything.

Available size: 22"	Weight/Pair: 2.6 lbs / 1.18 kg
Recommended shoe size	Jr. 3 - Adult 10
Frame and Decking:	Torsion Deck™, FLEX Tail™
Control:	QuickLock2™ Binding
Traction:	Traction Rails, Tubbs Toe Crampon
Other:	ActiveLift™ 16" Heel Lift

GLACIER

The Glacier is sure to please “tweeners” (approx. 10-15 years old) headed on adventures with the family. The Glacier has a tighter frame shape to accommodate a kid's narrower stance and a fixed toe cord to help the snowshoes stay close underfoot for improved maneuverability.

Available size: 21"	Weight/Pair: 2.6 lbs / 1.18 kg
Recommended shoe size	Jr. 3 - Adult 10
Frame and Decking:	Fit-Step™ Frame, Soft-Tec™ Decking
Control:	QuickLock2™ Binding
Traction	Recreational Toe and Heel Crampons

KIDS
STORM

With a tapered frame shape, the QuickLock™ binding, and fun graphics, the Storm is a true kid-friendly model. Best for kids ages 6-10 years old.

Available size: 19"	Weight/Pair: 2.0 lbs / 0.91 kg
Recommended shoe size:	Kids 11 - Adult 6
Control:	QuickLock™ Binding
Traction:	Kid-friendly Recreational Crampons

KIDS
FLEX JR.

The FLEX JR brings the award-winning FLEX Tail™ design to kids ages 6-10 years old. The simple QuickLock™ binding – with its easy-stretch heel strap – enables kids to take control.

Available size: 17"	Weight/Pair: 2.4 lbs / 1.09 kg
Recommended shoe size:	Kids 11 - Adult 6
Frame and Decking:	Torsion Deck™, FLEX Tail™
Control:	QuickLock™ Binding
Traction:	Traction Rails, Tubbs Toe Crampon

*In packed or variable snow conditions the FLEX JR is appropriate for all weights.
In soft snow conditions the FLEX JR is best for kids 40-90 lbs / 18-40 kg.*

KIDS
SNOWGLOW

Everything is more fun with flashing lights! The SnowGlow, designed for young snowshoers (approx. 4-8 years old), features flashing LED lights that light up with every step! In addition to the MotionBright™ lighting system, the simple QuickLock™ binding lets kids take control, while molded traction rails promote safe winter exploration!

Available size: 16"	Weight/Pair: 1.6 lbs / 0.73 kg
Recommended shoe size:	Kids 11 - Adult 6
Other:	MotionBright™ Lighting System

KIDS
SNOWFLAKE

Designed for our youngest snowshoers (approx. 3-6 years old), the Snowflake is a great introduction to snowshoeing. The Snowflake's fun design features an easy 2-step binding and, best of all, a sticker pack for boys and girls to customize their snowshoes.

Available size: 14"	Weight/Pair: 1.3 lbs / 0.60 kg
Other:	Sticker Pack for Custom Snowflakes!

ACCESSORIES

ACCESSORIES

SNOWSHOE HOLSTER

The snowshoe holster is the perfect way to transport your snowshoes and poles between snowshoeing excursions. The open design also allows your gear to dry for proper storage before your next adventure. Reinforced polyester material and straps help for attaching and carrying poles.

ACCESSORIES

SNOWSHOE PACK

Adjustable shoulder straps hold this anatomically designed pack snug against your back for hands-free movement and easy access. A grab-and-go side handle lets you transport your gear in one hand, while a durable nylon-canvas and mesh construction allows your snowshoes to dry between uses.

8 x 25 in.	20 x 64 cm
9 x 30 in.	23 x 76 cm
10 x 36 in.	25 x 91 cm

ACCESSORIES

MEN'S & WOMEN'S GAITERS

Water-resistant and breathable, full-length nylon gaiters provide protection from the elements by keeping snow out of your boots.

Men's Gaiters	One size
Women's Gaiters	One size

ACCESSORIES

2-PART & 3-PART SNOWSHOE POLES

Adjustable-length poles lend added security and stability on uneven, steep, or icy terrain. They can also turn an outing into a total body fitness workout! Featuring lightweight 6000 Series aluminum with a carbon steel tip, powder basket, and nylon wrist straps.

2-Part Poles (PR)	41 - 51" • 105 - 130 cm
3-Part Poles (PR)	31 - 57" • 80 - 145 cm

TUBBS TRACTION

Whether snowshoeing in the backwoods, or exploring steep pitches above 10,000 feet, we've got a specific traction setup just for you. The effectiveness of Tubbs traction is maximized by strategically placing heel and toe crampons under the weighted regions of the snowshoe deck, ensuring that with each stride, the crampons deliver the deepest penetration in the snow.

FORGED FROM CARBON STEEL, ALL OF OUR SNOWSHOES HAVE THE STRENGTH TO GRIP ICY AND SLIPPERY CONDITIONS.

TUBBS TECHNOLOGY

FRAMES AND DECKING	
	The Pro-Step™ frame combines a continuous frame bend with a longer, lower rise for improved flotation. The lower height nose packs easily, while the tail bend reduces impact on your joints.
	The innovative, upturned tail of the aluminum Fit-Step™ frame provides biomechanical benefits, reducing musculoskeletal impact on hip, knee and ankle joints by 10%.*
	SoftTec™ decking provides durable, lightweight flotation and has a smooth, soft texture.
	The patented FLEX Tail™ technology allows the snowshoe to roll more naturally from heel to toe. The FLEX Tail™ absorbs shock from the heel strike, reducing the amount of stress on joints.
	Tubbs' advanced Torsion Deck™ allows torsional articulation throughout the body of the snowshoe, enhancing traction, preserving your natural gait, and improving comfort on uneven terrain.

	TRADITIONAL SIZING			FLEX SERIES SIZING	
	USER WT*		SIZE	USER WT*	SIZE
	Under 50 lbs	23 kg	14"/16" Kids	ONE SIZE FITS ALL	FLEX JR 17
	40-90 lbs	18-41 kg	19" Kids		
	80-150 lbs	36-68 kg	21" Kids		
	80-150 lbs	36-68 kg	21 W	ONE SIZE FITS ALL	FLEX 22 W
	120-200 lbs	54-91 kg	25 W		
	170-250 lbs	77-114 kg	30 W		
	120-200 lbs	54-91 kg	25 M	UP TO 190 lbs	FLEX 24 M
	170-250 lbs	77-114 kg	30 M		
	220-300 lbs	100-136 kg	36 M	190 lbs +	FLEX XL 28 M

* User weight includes weight of gear.

ARTICULATION SYSTEMS	
	R2™ delivers shock-absorbing lateral flex and quick sidehill responsiveness, while maintaining a natural foot position. Full step rotation also sheds snow and allows the toe crampon to bite deeply.
	The Rotating Toe Cord design enables the tail of the snowshoe to drop, shedding snow and reducing cardio-respiratory strain by 7%*, while a Rotation Limiter prevents over-rotation.
	The Rotating Toe Cord design enables the tail of the snowshoe to drop, shedding snow off the tail. When weighted, the teeth on the toe traction underfoot bite deeply into the snow.
	The Fixed Toe Cord pivot system is efficient for flat and rolling terrain with packed snow conditions, and it keeps the snowshoe close to the foot for quick turnover.

* According to a study conducted by Ray Browning, Ph.D. (Colorado State University)

OTHER	
	Designed to make steep ascents easier, the ActiveLift™ heel lift reduces calf fatigue and Achilles tendon strain. It can be easily pulled up and down. The 19° Backcountry heel lift is ideal for extreme ascents, while the 16° Day Hiking version is designed for moderate terrain.
	Tubbs Snowshoes was the first company to manufacture gender-specific snowshoes, and remains committed to an ergonomics-first approach when designing all of our men's and women's products. Tubbs women's-specific snowshoes are lighter in weight, feature ergonomically-tapered frames for an easier stride, and offer women's-specific bindings, sized and scaled for a woman's boot (in sizes 5-11), for an optimal fit.
	Flashing LED lights with every step! Motion-activated LED lights create excitement to get outside. Battery included and replaceable.

BINDING SYSTEMS	
	The gender-specific, asymmetric ActiveFit™ provides the perfect combination of control, support, comfort and ease of use. Control Wings™ center the heel, while the padded midfoot delivers a custom fit without pressure points.
	The DynamicFit™ binding integrates the Boa® Closure System with the comfort of EVA foam, providing even pressure distribution around your boot and creating a precise fit with optimized control. Releasing the binding is as simple as pulling up on the Boa® dial.
	The gender-specific, asymmetric ActiveFLEX™ binding, featuring patented Control Wings™, provides lightweight control, support, comfort, and ease of use.
	Featuring the Boa® Closure System, the innovative and quick-to-secure CustomWrap™ binding provides optimal fit, comfort, and ease of use, encompassing your foot with the simple twist of a dial.
	Our most robust 180™ Series binding, the gender-specific 180™ Pro features rigid Control Wings™, a locking heel strap, and a padded upper for pressure-free comfort and added warmth.
	The streamlined 180™EZ binding features a simple, one buckle tightening mechanism, coupled with easy-to-use Control Wings™ and a heel strap for efficient, lightweight support.
	An intuitive forefoot strap on the QuickPull™ binding cinches easily and unlocks with one buckle push. The pivoting toe stop allows for speedy adjustments, and Control Wings™ keep your heel aligned.
	The QuickLock2™ binding slides easily to lock and stays snug around the boot, providing security and comfort.
	The simple tightening and locking buckle on the QuickLock™ binding makes getting kids in and out of snowshoes easier than ever.

TUBBS TECHNOLOGY

TRACTION	
	The razor-sharp, carbon steel Anaconda™ toe crampon has eight sharp teeth, providing constant contact and penetration in all types of terrain.
	The carbon steel Cobra™ toe crampon, located under the ball of the foot, provides constant contact in variable snow conditions, while its jagged tooth construction improves grip on packed snow and ice.
	The Viper™ 2.0 carbon steel toe crampon's jagged tooth construction maximizes weighted traction and responsiveness. The aggressive tangs in the toe crampon deliver an added degree of security on variable snow.
	Our Recreational series of carbon steel toe and heel crampons feature front and rear braking teeth for secure uphill, downhill, and sidehill grip on packed snow conditions.
	The aggressive Python™ heel crampon, centered under the boot, delivers enhanced downhill braking traction.
	The 3D-Curved Traction Rails ensure superior sidehill grip in hard-packed and icy conditions. The curved shape helps prevent fore-aft slippage on steeper terrain.
